● AREZZO and the surrounding area

Arezzo is one of the Tuscany's most ancient city, it was founded by the Etruscans and after that it was made a main area during the roman empire. In the Italian territory it's not usual to find a such small area which is able to offer a so huge environmental and cultural heritage. Even only a tour at the Cathedral to see the frescoes depicted by *Piero della Francesca* could represent a excuse to break one's journey in the city.

The great times of art and architecture of Arezzo are shown even by the medieval neighbourhood.

In the surrounding area it's possible to make a tour through others treasures such as *Cortona* and *Cetona*, discover the *Valdichiana* and *Casentino* valleys, all places with their naturalistic and wine and food routes.

Thanks to many links you can easily reach others important cities such as Siena, Pisa and Lucca.
